

Dear Parent/Carer,

Social Media and keeping your child safe: E-safety - key information for parents/carers

It has been brought to our attention that some of our children have Facebook, Instagram, and other social media profiles even though the permitted minimum age to use these sites is **13 YEARS OLD**, according to their terms and conditions.

At Horton Mill we are committed to keeping our children safe and to promoting the safe, responsible use of the Internet. As such, we feel it is our responsibility to raise this particular issue as a concern.

1) Individual profile problems

We have discovered that many of the children's social media profiles:

- are not properly secured with poor privacy settings that mean anyone in the world can see their profile;
- have pictures of them (and other children) in their school uniform, which makes them easily identifiable and means people can work out where they will be in real life;
- have content which is wholly inappropriate in terms of the language and/or images on them. (And even if your child's profile is appropriate, being 'friends' with someone who has such a profile means your child can see it).

2) General social networking issues

Websites such as **Facebook**, **Instagram** or **Snapchat** offer amazing communication and social connections, however they are created with their audience in mind and this is specifically over **13 years old**. **There are also** Possible risks for children under 13 using the site may include:

- They use "age targeted" advertising and therefore your child could be exposed to adverts of an inappropriate nature.
- Children may accept friend requests from people they don't know in real life, which could increase the risk of inappropriate or dangerous contact or behaviour
- Language, games, groups and content posted or shared on social media is not moderated, and therefore can be offensive, illegal or unsuitable for children.
- Photographs shared by users are not moderated and therefore children could be exposed to inappropriate images or even post their own.

3) Parental Responsibility

We feel it is important to point out to parents the risks of underage use of such sites, so you can make an informed decision as to whether to allow your child to have a profile or not at the moment. Should you decide to allow your child of any age to have a social media profile, including YouTube accounts, we strongly advise you to:

- Check their profile is set to private and that only friends can see information that is posted

- Monitor your child's use and talk to them about safe and appropriate online behaviour such as not sharing personal information and not posting offensive messages or photos

- Set up your own profile so you understand how the site works and ask them to have you as a friend on their profile so you know what they are posting online

- Make sure your child understands the following basic E-safety rules that we have learnt about at school.

- Always keep your profile as private as possible.

- If possible, don't put in your full name, e.g. Bart S, instead of Bart Simpson.

- Never accept friends you don't know in real life - Never post anything - writing or images which could reveal your identity.

- Never post anything you wouldn't want your parents to see.

- Never reveal your location (make sure that 'Location services' is turned off in 'settings' on your phone.

- Never agree to meet somebody you only know online without telling a trusted adult

- Always tell someone if you feel threatened or someone upsets you.

We also recommend that all parents visit the CEOP Think U Know website for more information on keeping your child safe online www.thinkuknow.co.uk

Please do not hesitate to contact me if you have any concerns or questions about keeping your child safe online.

Yours Sincerely,

Zaira Cook
